## EDUCATION

B.S. Computer Science

Aug 2016 - May 2019

California State University,  
Fullerton

Fullerton, CA

## PROGRAMMING LANGUAGES

JavaScript

HTML/CSS

PHP

SQL

PYTHON

## ABOUT ME

Recently graduated software developer with a passion to create software and web applications. Looking to apply skills that I have learned throughout my college career in a real-world environment.

## PROJECTS

### burger-builder

- Personal project built on a ReactJS framework
- Single Page Application with authentication connected to Google Firebase
- Incorporated lazy loading and routing
- Implemented Redux
- Provided several unit tests with Jest and Enzyme
- Used ES6 (ESNext) JavaScript

### Pokedex

- First project build on ReactJS
- Wrote functional UI components such as a modal
- Worked with the pokemon API using the axios package
- Written with ES6 JavaScript

### Company Database application

- Incorporated HTML/CSS/PHP/SQL, styled with Bootstrap
- Basic security filtering user input
- Implemented authentication methods with PHP
- Provided session control for registered users
- Developed mock database schema with tables that supported 3<sup>rd</sup> normal forms

### manga-updater

- Created a Python script to notify me via e-mail when a new chapter of a certain book or manga is released
- Scrapes information of the new chapter and populates the wanted details into a Google Spreadsheet
- Incorporated technologies: Google Drive API, Google Spreadsheets API, Selenium, BeautifulSoup

## SKILLS

- ReactJS
- Redux
- Jest and Enzyme for development Testing
- ES6 JavaScript Syntax
- Git and GitHub
- Bootstrap, Responsive Web Design
- Highly adaptable, embrace teamwork, but also enjoy working independently
